Subject	Quality Policy		

At **KORMAS Electric Motor Industry and Trade Inc.**, meeting customer expectations and requirements in full for the DC electric motors, convectors, axial fans, and other product groups we manufacture for the automotive and industrial sectors is our primary objective.

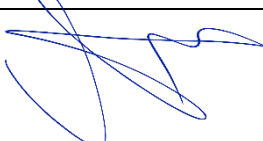

In line with the requirements of the **ISO 9001:2015 Quality Management System**, we aim to continuously improve all our processes, embed a culture of sustainable quality throughout our organization, and become a reliable, innovative, and preferred global brand in our industry.

Accordingly, we are committed to:

- Accurately analyzing customer needs and expectations and providing fast, effective, and sustainable solutions;
- Continuously improving the quality of our products and services to maximize customer satisfaction;
- Continuously improving our processes through risk- and opportunity-based thinking;
- Promoting quality awareness throughout the organization by increasing employee participation;
- Developing sustainable partnerships based on mutual trust with our suppliers and business partners;
- Supporting innovative and efficient manufacturing systems by following technological developments;
- Ensuring full compliance with applicable legal requirements and customer specifications;
- Sustaining corporate development through a process-oriented and performance-based management approach;
- Utilizing and planning our resources effectively by taking advantage of developing technologies in order to achieve and continuously improve our process objectives.

Being aware of the importance of maintaining the continuity of our **ISO 14001 Environmental Management System** and **ISO 45001 Occupational Health and Safety Management System**, we are committed to progressing with respect for the environment and human health while striving to be among the best in our industry.

With our philosophy of “The Power That Drives Life,” we uphold quality not only in our products but throughout our entire corporate culture.
